Newsletter for our Patients

in the office of Dr. Arthur Rosner

Dear Patient,

Here at Lifestyle Hearing, we're **Changing Lives ... One Ear At A Time**. And, we're also making some changes ourselves as we transition from a single provider to a full department.

We're excited to announce our new Walk-In Hours, where a dedicated staff member will be available to quickly assist you with cleaning your hearing aid, purchasing and changing batteries, and give instructions on how to properly care for your hearing aid. Walk-In Hours are Monday through Friday, 9:30 – 11:30 a.m. and 1:30 – 4:30 p.m.

Listening in noisy environments is often the biggest complaint for most people with hearing loss. The addition of the QuickSIN (Speech-In-Noise Test) during our hearing test process gives us another tool to help ensure that you are fit with the right type of hearing aid.

Improvements to our fitting and follow-up process are also on their way with the installation of a second GN Otometrics PMM Aurical, a unit that performs real-ear measurements. This allows your clinician to verify what the hearing aid is doing at your eardrum level, ensuring more precise fittings and higher satisfaction.

What's not changing is our convenient expertise. Studies have shown the most satisfied hearing aid wearers purchased them where an ENT physician and audiologist work together. And, that's exactly what you get at Lifestyle Hearing. The coordination of care between Dr Rosner and Lifestyle Hearing means we can make sure you see the correct professional the same day you visit, making us not only the most competent choice, but the most convenient one as well.

We are here to support you on your way to better hearing. Call today: (248) 918-0037

Sincerely,

The Staff @ Lifestyle Hearing

How Assistive Listening Devices Can Enhance Your Hearing Aids

There are many Assistive Listening Devices (ALDs) that can enhance and improve your performance when using a hearing instrument. Here are just a few examples of what's available to you:

- **STREAMERS**

A streamer is a device that can be worn around the neck or kept in your pocket that allow you to wirelessly connect to your cell phone or listen to music from an audio source with Bluetooth capability.

- **MEDIA DEVICES**

A media device can be wired to your TV, stereo, or any sound source. The sound travels from the device to your hearing aids wirelessly, providing natural, clear sound without ambient noise interference.

- **REMOTE MICROPHONES**

In particularly loud listening environments, hearing aids alone may not always be enough. Having a companion or loved one wear a microphone (on their lapel or shirt collar) will allow their voice to be streamed directly into your hearing aids, ensuring you hear them over the surrounding noise.

If any of these devices sound interesting, please call (248) 918-0037 to make an appointment!

Call Us Today For an Appointment and Receive...

- Complimentary Clean & Check of Your Current Hearing Aids
- Complimentary Demonstration of NEW Z Series Technology
- Complimentary, No Obligation 2-Week Test Drive of New Technology
- Monthly Financing Available

Walk-In Hours

9:30 – 11:30 a.m. and 1:30 – 4:30 p.m.

Stop in during our new Walk-In Hours for quick assistance with:

- Hearing Aid Cleaning
- Hearing Aid Instruction Care
- Battery Purchases
- Wax Guard Purchases

**Please note programming changes to your instruments require an appointment.*
